**Subject:** Comments/Edits on Response to General Comments & For Your Review: Draft Response on to comments on MMs in which we did not request public review  
**Attachments:** Response to Comments DRAFT 081214 JC Cmts.doc

Hi Allison,

I finally finished my review on the responses to the general comments (up to page 15). See comments and edits. You did a fantastic job and I am so sorry it has taken me so long.

All:

Might be a good time to begin drafting the standard paragraph regarding comments on other MMs. Based on your response to comments and noncontroversial paper, I compiled the following for technical review. See below.

Thank for your comments on \_\_\_\_\_. During the public comment period held between December 20, 2013 and March 20, 2014, NOAA and EPA did not propose a decision on the approvability of \_\_\_\_\_ and did not solicit comment on this issue at this time. NOAA and EPA are only considering comments related to new development, OSDS, additional management measures for forestry and agriculture regarding CZARA at this time. The public will have an opportunity to comment on \_\_\_\_\_ at some point in the future before the agencies fully approve Oregon's coastal nonpoint program. If your comments are relevant when NOAA and EPA are requesting comment on that aspect of the program, then we encourage you to submit them at that time.

**Subject:** Updated Response to Comments including New Riparian Summary Comments

All--

As discussed on the call this afternoon, please see attached for updated responses to all general comments (Sections I through V) as well as the new more detailed summary of the forestry riparian comments based on additional input from the rip tech team.

I welcome feedback on the responses to the general comments, especially from Jayne and Don.

Cheers,  
Allison
